

April 18, 1968

Dr. Alice C. Evans
1661 Crescent Place, Apt. 604
Washington, D. C. 20009

Dear Dr. Evans:

Thank you very much for your letter and reprint about chronic brucellosis. I do regard the pursuit of biological weaponry and our simultaneous neglect of the threats of world pestilence as two of our major problems of biological policy, and I intend to have much more to say about them in future.

I was amused that you thought that I might not know of you, at least by reputation!

Sincerely yours,

Joshua Lederberg
Professor of Genetics

JAMWA 1961
